Objective

Computer Science graduate with practical, self-taught experience in full-stack development using the MERN stack. Strong problem-solving mindset, proven through building and debugging real-world projects under tight deadlines. Seeking a junior developer role to grow through hands-on learning and contribute to impactful applications.

Education

B.Sc. in Computer Science

NIIS Group of Institutions, Bhubaneswar — CGPA: 8.11

Graduated: May 2025

Technical Skills

Languages: JavaScript, Python, HTML, CSS

Frontend: React.js, Tailwind CSS, React Hook Form, React Query

Backend: Node.js, Express.js

Database: MongoDB, Mongoose

Other Tools: Git, GitHub, Postman, JWT, REST APIs, Cloudinary, node-cron, Render

Projects

FinTrackr — Personal Finance Tracker

Stack: React, Node.js, Express, MongoDB, Tailwind, JWT, node-cron

- Built a MERN app to track personal & recurring expenses with secure user auth (JWT + bcrypt).
- Automated recurring entries using `node-cron`, handling time zone mismatches (IST–UTC).
- Optimized UX with React Hook Form & TanStack Query; tested APIs with Postman.
- Deployed on Render (free tier — may sleep).
- [Live Demo](#) • [GitHub](#)

HireWave — Job Portal (Academic Project)

Stack: React, Node.js, Express, MongoDB, Cloudinary

- Led final-year job portal project; took over mid-build and delivered under deadline.
- Implemented role-based login & dashboard (students/employers) with JWT & session persistence.
- Integrated Cloudinary resume uploads; resolved CORS and token issues across stack.
- Debugged and deployed from partial code handoff in ad-hoc team setup.
